Art Unit: 1616

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 71, 76-86 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 15 and claims 2-6 of U.S. Patent No. 6,287,604 and 6,312,732 respectively. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims encompass claim 15 of US '604 when the particulate carrier and the immunogen carrier are the same. The immunogen of the instant claims encompasses in its scope the macrophage stimulator of claim 15 of US '604. Similarly, the instant claims encompass claims 2-6 of US '732 for the case where the particulate carrier and the immunogen carrier are the same, the immunogen entrapped in the particulate carrier, encompassing in scope the influenza protein of the patented claims.

Claims 71-86 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 it is unclear as to whether the particulate carrier and the physiologically acceptable carrier are the same. It is further unclear as to whether "carrier thereof" refers to the immunogen alone or both the immunogen and the particulate carrier. Additionally, it is unclear as to whether the immunogen is attached to the particulate carrier. That is, is it the biologically active material "carried" by the particulate carrier. "particulate carrier" is also unclear; is the biologically active material carried within the particle or is it chemically attached?
"

The straight line on line 6 and the location of the formula are clearly indefinite; it appears that the line should be replaced by the formula. Lastly, "said carrier" is vague; it is unclear as to which carrier the formula refers, the particulate carrier, the physiological acceptable carrier, or both.

In claims 77 and 83 "derived" is vague; what derivations are contemplated?

In claim 79 line 2 "hydroxy" is misspelled.

In claim 86 "biologically active species" is vague; is it the immunogen in claim 71?

No claims allowed.
